    ‘Innovation in Building Materials: Waste, Reuse & Recycling’ (1.0 PDH)

5:30 pm - 9:00 pm  First Fridays Social & Public Awareness Event - PGASLA Office Crossroads Arts District
The intent of the new campus master plan is to preserve and enhance natural habitats, focus on improving vegetation and hydrology of the site, and create an active and healthy environment that employees can be proud of and inspired to interact in. The project addresses several sustainable design best practices including hydrology, wildlife habitat enhancement and monitoring, improved soils and vegetation. There is an emphasis on using regional materials and implementing features that address human health and well-being of site visitors and employees.

The Little Light House Campus Master Plan showcases a variety of uniquely designed play spaces and sensory experiences for the clients, their families and the community, including a prayer garden, sensory garden, and enhancements to an existing traditional playground area. The landscape architect focused on creating whimsical sensory gardens, both interior and exterior, adapted to the varying needs and abilities of the children and focused on improving their everyday experiences.
This publication and website were created to promote multifunctional landscape design by providing a comprehensive fieldbook of science-based guidelines for planning and designing conservation buffers. Over 80 illustrated design guidelines covering seven resource categories were synthesized and developed from a review of over 1,400 research publications. This publication is intended for all people involved in land-use planning and design in rural to urban landscapes. The author incorporated principles of effective science delivery to communicate complex concepts and to create a physical format that maximized usability.

The author incorporated principles of effective science delivery to communicate complex concepts and to create a physical format that maximized usability.

- Define and map hunger patterns to identify key areas and opportunities for efficient development of the food pantry system.
- Redesign the Des Moines area food pantry system and investigate ways to integrate fresh foods for pantry users to improve their quality of life and the urban agriculture environment.
- Remove the stigmatization of receiving food aid and provide the means to empower citizens to provide for themselves.

THANK YOU TO OUR 2012 PREMIUM SPONSORS:

Cripple Creek Rock Company, where the steer horn gates open every day of the week like a season episode of Dallas. 7 acre outdoor showroom where you will find every natural stone imaginable. Firepits, outdoor kitchen ideas, water garden supplies, boulder bubbler fountains in every color of the rainbow! Visit us at www.CrippleCreekRockCompany.com

Ironsmith has been manufacturing tree grates, trench grates and bollards for over thirty years, and leads the industry in custom designs. Standard products include: tree guards, straight and radius trench grates, bollards and Paver-Grate Systems™. IRONSMITH is proud to sponsor this year’s conference. For information, call: 800-338-4766 or visit our website www.ironsmith.biz

Landscape Brands manufactures high quality site furnishings at an exceptional value. Founded in 1970 around the first aggregate panel litter receptacle, the company now offers many lines of benches, receptacles, recyclers, tables, bike racks and other products. Landscape Brands is an innovative leader in the site furnishings industry.

landscapeforms™

For more than 40 years Landscape Forms has produced site furnishings that help create a Sense of Place. We offer integrated collections, leading-edge LED lighting technology and great design. We partner with designers to create products, we nurture our people to high achievement, and we build customer loyalty through exemplary service.

Musselman & Hall Contractors has built a distinct reputation as the premier architectural concrete contractor among designers and owners alike. This reputation is backed by numerous project awards. Our organization strives to be in the forefront of the architectural concrete industry through continuous innovation and quality craftsmanship.

AND THANK YOU TO OUR 2012 EXHIBITORS:
